

Getting ready for group activity 2

Business Case Builder User Guidance and Demo

Where to find the Business Case Builder

Get the tool

1. If you have access to the Partner Center Download the Advanced Business Case Builder Excel workbook from the [BCB Transform Page](#)
2. If not it will be provided in the resources

The screenshot shows the Business Case Builder website. The top navigation bar includes links for OnRamp, BCB, Analyst Studies, Business Cases, Learning, Dashboard, and Help. The main header features the title "Business Case Builder" and the subtitle "Modern Work, Security, and Surface". Below this, a paragraph explains that the tool uses real customer data to show ROI and provides standardized and custom calculations. A call to action states: "Leverage the Business Case Builder to accelerate your customers' digital journey today!".

The main content area is divided into two sections. On the left, "The Process" outlines five steps: 1. Select your customer (Identify the account for which you'd like to complete an ROI analysis. Add an Account or click 'Dashboard' to view your existing accounts.), 2. Input licensing information (To make creating business cases easier for key sales scenarios, we have created a custom calculator for each Enterprise sales play. Virtuous Upsell licensing scenarios are also available and will prepopulate the licensing, current environment, and deployment selections for the selected scenario.), 3. Enter current environment (Input your current Microsoft and competitor solutions to calculate vendor displacement costs.), 4. Customize results (Edit the deployment schedule based on your customer's needs. Customize cost and benefit calculations for a more detailed analysis.), and 5. Share the analysis with your customers (On the results page, download a shareable PowerPoint presentation with your unique calculation for your customer to share with their stakeholders.). A blue button labeled "Let's Get Started" is at the bottom of this section.

On the right, "Business Case Builder Overview" features an illustration of a woman pointing to a large blue arrow that says "Building your business case with the Business Case Builder". Below the illustration is a button labeled "Overview".

A callout box with a blue circle containing the number "1" points to a link that says "Click here to download the Advanced (Excel) Business Case Builder".

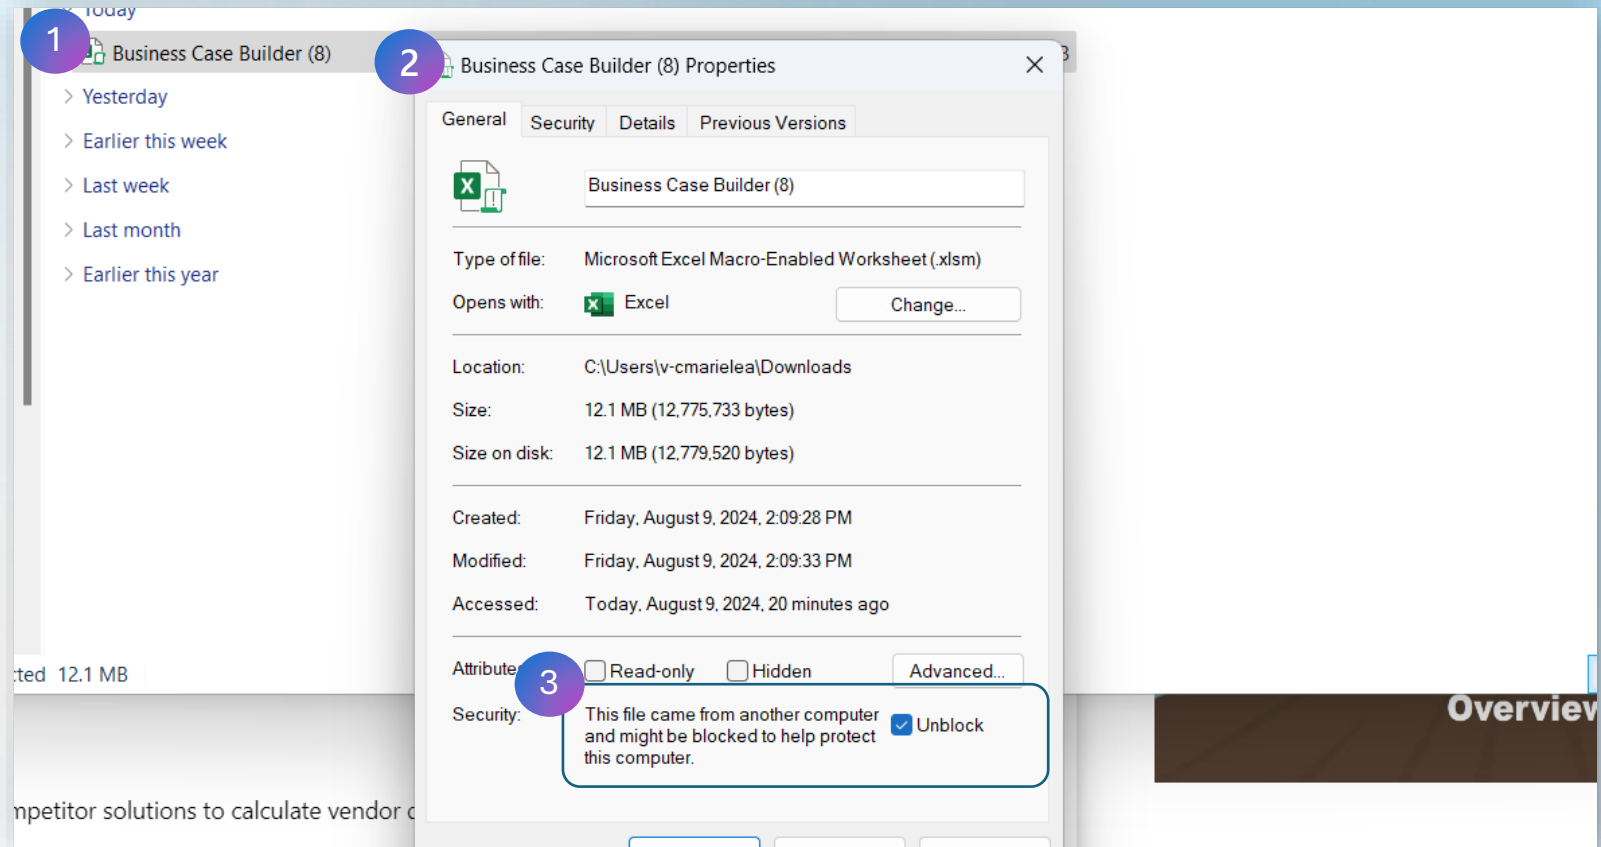

Security Protections: Unblock macros before using the BCB

Enabling Macros

1. Open File Explorer
2. Right click on the BCB file and select "Properties"
3. Check the "Unblock" checkbox

Attention!

This step is part of Microsoft internal security. The BCB will not run properly if the macros are not enabled..

Business Case Builder Tool Setup

Enter Customer Information

1. **Required:** enter organization name, TPID, industry, country (currency will automatically adjust), revenue, and total users
2. Salary levels and length of the analysis used are **optional**
3. Select **analysis type** based on the product you are selling
 - **Standard Analysis** is the default is used for all product combinations
 - If creating a Microsoft 365 Copilot case, select the **Copilot for M365 Analysis**
4. Click "**Begin Analysis**"

Microsoft Business Case Builder v9.4 - released 29Aug2024

Tool Setup

1. Enter the company name here
0 Enter the Microsoft TPID if applicable, otherwise leave blank
Pick an industry for your company
Pick your customer's country/region to select currency and wage rates
\$
\$1.00 per USD. Modify as necessary.
Enter the total number of users at the organization
Find the company revenue in an annual report or from various Internet sites
Find the company gross profit margin in an annual report or use an industry average

2. Annual fully burdened cost for IT admin FTE \$94,080 Includes salary of \$78K and tax and benefits of \$17K.
Annual fully burdened cost for knowledge worker \$90,552 Includes salary of \$75K and tax and benefits of \$16K.
Annual fully burdened cost for frontline worker (non-sold) \$35,280 Includes salary of \$29K and tax and benefits of \$6K.

How many years does your analysis include? 3

3. What type of analysis do you want to perform? **Copilot for Microsoft 365** Create a report for an analysis of Copilot for Microsoft 365 business value

4. **Begin Analysis**

Available analysis types

Standard Analysis

- Copilot for Microsoft 365
- Copilot for Security
- Microsoft Intune
- Conv Comms - Basic Phone, Rooms, and Premium
- Advanced Teams Meetings Calling and Devices
- Advanced Teams Rooms
- Microsoft Viva Suite
- Windows 365
- Education licensing
- Microsoft Surface
- Google Workspace TCO comparison
- Microsoft Project
- Vendor Consolidation
- Impact of a breach

Select the products/solution plays to include in a financial report or product proposal

- Create a report for an analysis of **Copilot for Microsoft 365** business value
- Create a report for an analysis of **Copilot for Security** business value
- Create a report for an analysis of **Intune** business value
- Conversation starter and report for **Teams Phone, Teams Rooms, and Teams Premium**
- For an advanced **telephony team discussion and Telephony report**
- For an advanced **Teams Rooms analysis and report**
- For a focused discussion and report about **Viva employee experience** solutions
- For an evaluation of **Windows 365** costs and benefits and Windows 365 report
- Help produce a custom pitch deck on EDU licensing changes and upgrading to Microsoft 365
- For a **Surface hardware team discussion and Surface report**
- For a **Google Workspace compete** discussion and report
- TCO Comparison of Project for the web versus alternatives
- Calculate the savings on third-party products and output a slide
- Estimates the cost of poor security for an organization - use to frame the need for security

Attention!

Company Name, TPID, Total User, and Analysis Type are required. If you don't know the TPID or are creating a test case, you can leave it blank by manually deleting the contents of the cell

Entering Copilot usage information

Copilot tab

1. Tool functions – here are options for contacting support, resetting the sheet, and creating the reports for easy access.
2. Navigation buttons – you can use these buttons to quickly navigate to the different tabs of the BCB.

Microsoft 365 Copilot value assessment

Microsoft

Step 1. Prepare to use the tool.

Step 2. Enter your customer's usage information.

Do you have usage data from a customer dashboard?

Basic time savings from Copilot - how are your employees saving time?

What types of users will receive Copilot licenses	What is the percentage of licensed Copilot users in this role?	Meet Hours of meetings summarized per day	Estimated time savings per meeting hour summarized	Search Number of searches and summaries per day	Estimated time savings per search and summary in minutes	Create Number of documents, emails, and chats per day	Estimated time savings per item in minutes	Time saved per day in minutes	Percent of time used for other productive activities	Average salary	Annual time savings
Executive	5%	-	32.00	3.00	6.00	4.00	6.00	42.00	25%	\$178,400	\$3,859
Manager	15%	0.50	32.00	3.00	6.00	3.00	6.00	52.00	25%	\$107,600	\$1,185
Individual Contributor								42.70			\$1,392
Marketing	10%	0.20	32.00	2.00	6.00	4.00	6.00	42.40	25%	\$58,800	\$1,299
Sales	15%	0.50	32.00	2.00	6.00	3.00	6.00	46.00	25%	\$58,800	\$1,409
HR	5%	0.20	32.00	2.00	6.00	3.00	6.00	36.40	25%	\$58,800	\$1,115
Finance	5%	0.20	32.00	4.00	6.00	3.00	6.00	48.40	25%	\$58,800	\$1,482
Operations	30%	0.20	32.00	3.00	6.00	3.00	6.00	42.40	25%	\$58,800	\$1,299
IT	10%	0.20	32.00	3.00	6.00	3.00	6.00	42.40	25%	\$89,376	\$1,974
Other	5%	0.20	32.00	2.00	6.00	3.00	6.00	36.40	25%	\$58,800	\$1,115
Average		0.28	32.00	2.70	6.00	3.15	6.00	44.06	25%	\$76,558	\$1,757

How do I fill this out?
 Step 1 Select your data source and enter your data
 Step 2 Estimate the percent of Copilot users in each role in col
 Step 3 If required, update the time savings data per role in col
 Step 2 The data is combined into a total time saved in Column
 Step 3 The value of the time savings is K/480*L*M or time sav
 per day/480 minutes per day * % that we count * salary

What do these numbers mean?
 Even minor changes in daily activities and conservative estimate savings productively lead to large benefit opportunities.
 Someone's salary the less time they need to save to pay for M Copilot.

Is there actual value here?
 Salaries should really be the minimum measure of the value o
 Using hourly revenue per employee would generate a higher i
 Complete Step 4 if you want to go deeper into cost savings an
 based on KPI change rather than time savings.

Selecting the KPI Analysis option

1

Licensing

Update the number of purchased licenses and pricing per year

2

Deployment

Update the number of deployed licenses per year

Step 3. Review time savings analysis information.

3

Select the type of analysis you want to do

Report based on KPIs

Note: We are assuming on average that 11 minutes are used productively and 33 minutes are used by the employee for work/life balance, which can increase employee satisfaction a

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Average
Deployed users	1,000	1,000	1,000	1,000	1,000	1,000	1,000
Total time savings in hours at 25% recapture.	46,355	46,355	46,355	46,355	46,355	46,355	46,355
Total value of time savings based on salary	\$1,757,000	\$1,757,000	\$1,757,000	\$1,757,000	\$1,757,000	\$1,757,000	\$1,757,000

What type of analysis should I choose?

Report based on Time Savings

Use this report as a first pass at numbers if the customer is not ready to talk through use cases and KPIs. This set of benefits is based on usage information from Step 2 and uses default values based on the Work Trend Index report. There is a link to the report in Step 1. This report does include the costs from the cost section below and includes the cost of lost productivity by default. It includes this to balance the productivity gains with the productivity losses.

Report based on KPIs

This report provides a clear explanation of how a customer will achieve the benefits we are claiming across cost savings, cost avoidance, and revenue gains. It requires the customer to understand their Copilot use cases and success measures. It does not use the usage data from Step 2 by default.

Copilot Tab

1. Update **licensing information** to change number of licenses purchased and pricing
2. Update **deployment information** if not all licenses purchased will be deployed immediately
3. Choose the **analysis type**
 - a. Create **Report based on KPIs** for customers interested in seeing the source cost savings and revenue gains
 - b. You can create a report based just on time savings if the customer is not ready to look at KPI information.

Attention!

There are 2 types of analyses available:

- KPI analysis
- Time Savings Analysis

These are **mutually exclusive** and will result in **different ROI**

Copilot KPI Analysis

Copilot Tab

1. Use the **Copilot KPI Calculations** option to enter KPI data. Use the **Scenario Library** tab to help identify KPIs and use cases
2. Summary of the cost savings benefits. Use the percentages to vary the benefit by year. Optionally, you can include internal labor cost savings.
3. Benefit of employee engagement from the time savings not used for KPI improvements

Step 4. Quantified Benefits and Costs - click on the calculation name to modify the calculations - uncheck to remove from calculations

Copilot KPI Calculations
Select and update the KPIs to include in the financial analysis

1 Copilot Scenario Library
Discuss the KPIs and use cases that Copilot can impact

Cost savings benefits of Copilot - what are the benefits of working faster?

	Base	Year 1 %	Year 2 %	Year 3+ %	Average per year
Cost savings from reduced vendor spend	\$0	0%	100%	100%	\$0
Cost savings from Service process improvements	\$0	100%	100%	100%	\$0
Cost savings from Operations process improvements	\$0	10%	30%	100%	\$0
Additional cost savings	\$0	100%	100%	100%	\$0
☒ Cost savings on internal labor (use check box to include)	\$0	5%	5%	5%	\$0

2

Cost Savings

\$1.3M

Cost savings benefits of Copilot - what are the benefits of improved employee engagement?

Cost savings from employee retention	249,312	25%	50%	100%	\$1,312,098
--------------------------------------	---------	-----	-----	------	-------------

3

Cost Savings

\$1,312,098

Cost avoidance benefits of Copilot - what are the benefits of using Copilot versus a third-party solution?

☒ Cost avoidance of purchasing competitive AI products

Licensing impact of third-party AI	\$0				\$0
Security impact of third-party AI and shadow IT	\$0				\$0
Administration impact of third-party AI	\$0				\$0
Integration costs of third-party AI	\$0				\$0
App switching impact of third-party AI	\$0				\$0
☒ Reduced development costs due to Business Copilot solutions and Copilot Studio	\$0				\$0
Additional cost avoidance opportunities	\$0	100%	100%	100%	\$0

Cost Avoidance

Not Quantified

Revenue benefits of Copilot - what are the benefits of improved quality and volume?

Revenue growth from Sales	\$0	0%	30%	100%	\$0
Revenue growth from Marketing	\$0	100%	100%	100%	\$0
Revenue growth from Finance	\$0	100%	100%	100%	\$0
Revenue growth from Operations	\$0	100%	100%	100%	\$0
Additional revenue growth opportunities	\$0	100%	100%	100%	\$0

Revenue Growth

Not Quantified

How do I achieve these benefits?

Copilot benefits can be achieved in many ways. Pick the KPIs that match your business plans. Some of the examples here are vendor spend, outsourcing, reduced supply chain costs, and internal labor costs.

Base - the amount calculated on the Copilot Use Cases tab based on analyst data or your inputs. This value represents the total possible benefit.

Year x% - the amount of the benefit achieved each year. This could vary based on deployment, adoption, and learning curve. If a department will only have a partial deployment they you will want to edit these percentages accordingly.

Average per year - this is the average benefit achieved per year over the duration of the analysis

The **Cost savings on internal labor** defaults to off, but you can select it if that is part of your business plans. This selection will use the time savings benefits from Step 3. Including the full amount of internal cost savings would likely result in achieving fewer other types of benefits.

Why engagement?

When we assume that only a small percentage of the process efficiency gains are used for work that means the vast majority are used to improve work/life balance. Any resulting decrease in turnover can provide a significant source of cost savings.

What costs am I avoiding?

If you are considering alternatives to Microsoft 365 Copilot for generative AI, then we'd like to measure the cost implications of that decision across licensing, security, administration, integration, and efficiency.

Copilot Studio also provides the opportunity for rapid development of Copilot extensions and can result in avoided development costs.

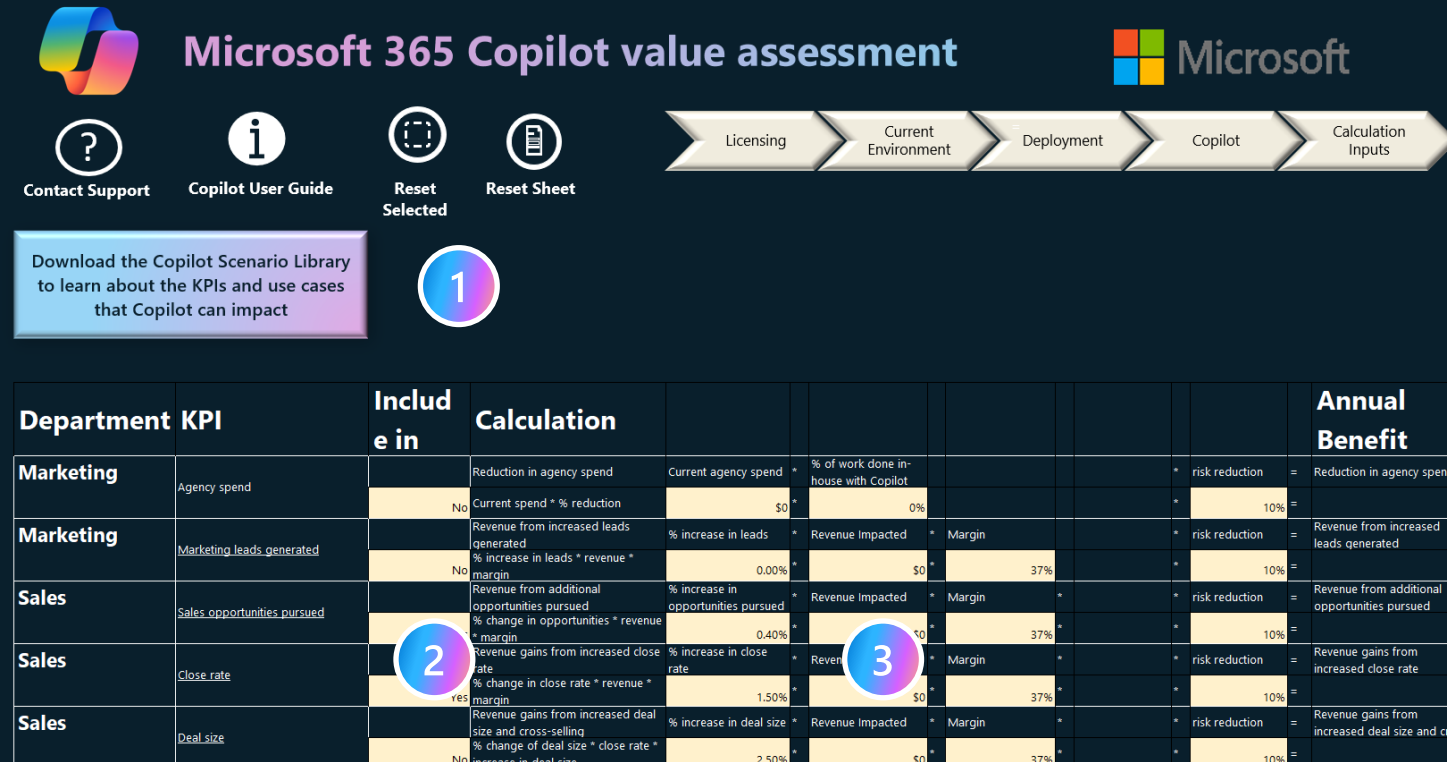

How can Copilot help my company grow?

Using the Scenario Library deck we can illustrate the impact on important business processes for various departments. Improving processes can impact the KPIs that drive revenue for your company. Use the example calculations on the Copilot Use Cases tab or create your .

Copilot KPI Analysis

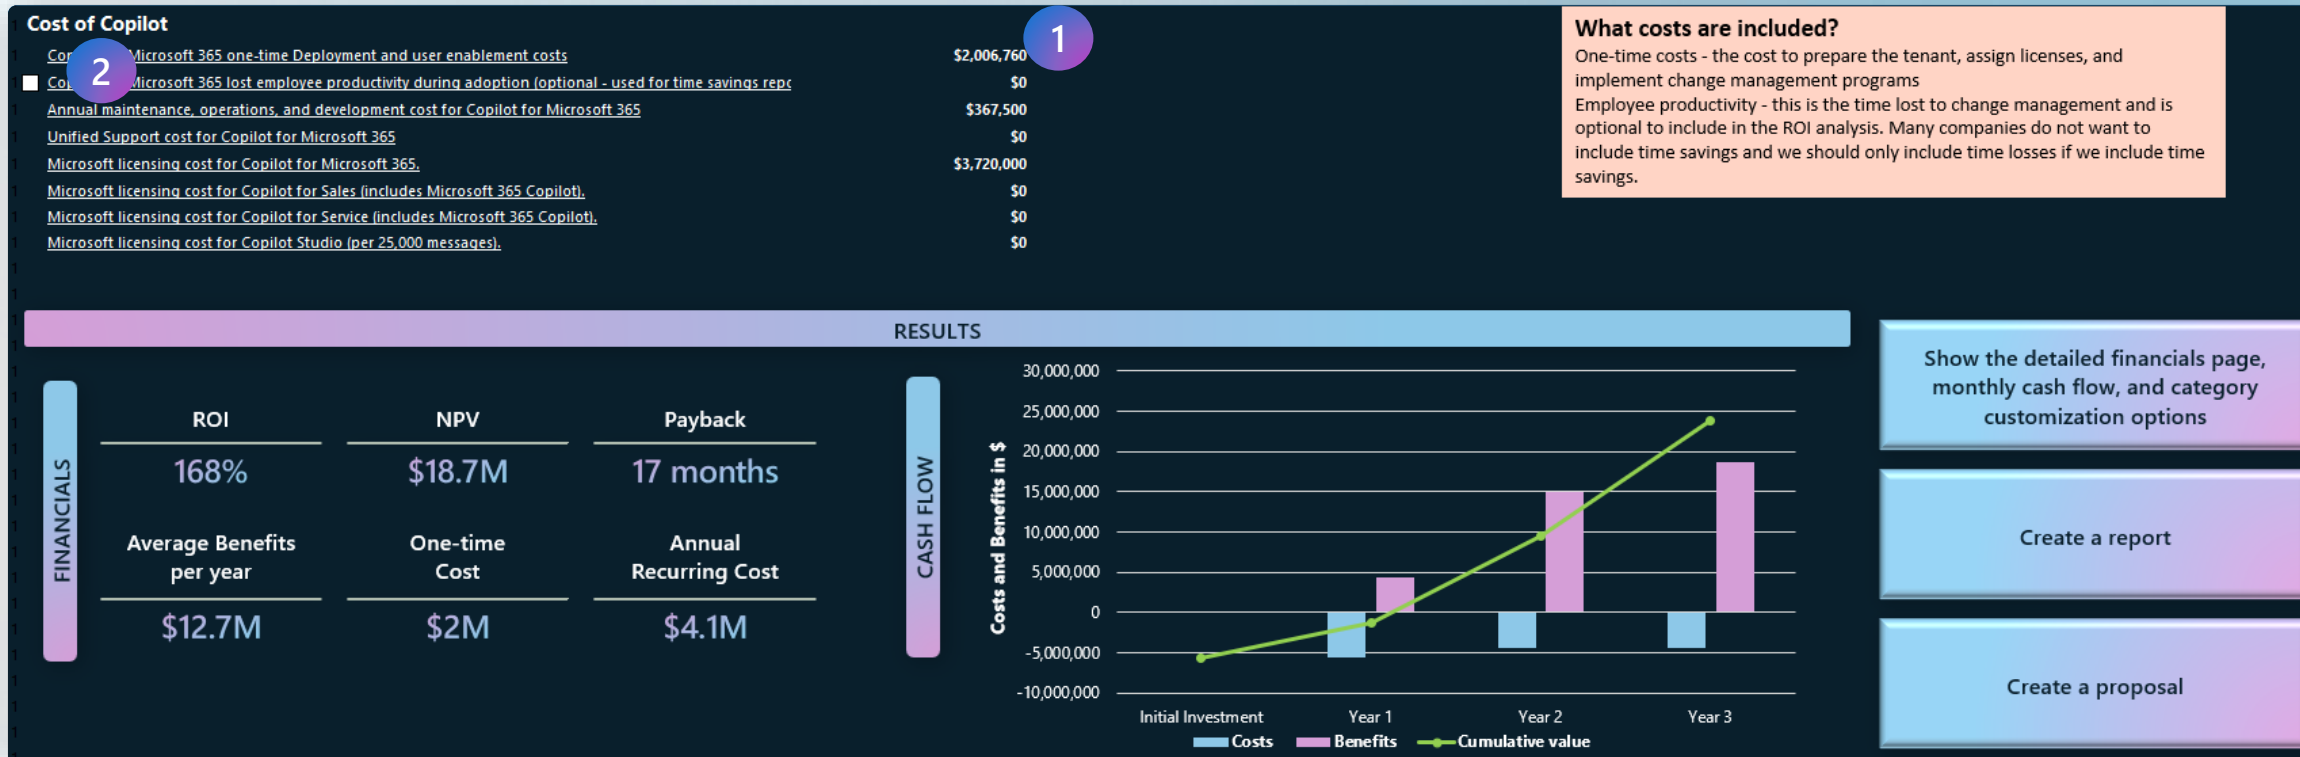

Copilot KPI Calcs tab

1. Link to the [Scenario Library](#).
2. Choose **Yes** to include specific KPI calculations in your analysis. KPIs with clear benefits in the Forrester TEI report are included by default.
3. Enter your customer's data or use the default values.

Department	KPI	Include in	Calculation							Annual Benefit
Marketing	Agency spend		Reduction in agency spend	Current agency spend	* % of work done in-house with Copilot				* risk reduction	= Reduction in agency spend
		No	Current spend * % reduction	\$0	* 0%				* 10%	=
Marketing	Marketing leads generated		Revenue from increased leads generated	% increase in leads	* Revenue Impacted	* Margin			* risk reduction	= Revenue from increased leads generated
		No	% increase in leads * revenue * margin	0.00%	* \$0	* 37%			* 10%	=
Sales	Sales opportunities pursued		Revenue from additional opportunities pursued	% increase in opportunities pursued	* Revenue Impacted	* Margin			* risk reduction	= Revenue from additional opportunities pursued
			% change in opportunities * revenue * margin	0.40%	* \$0	* 37%			* 10%	=
