Copilot value journey

Grow value from a base of solid usage and individual productivity by optimizing functional processes and impacting the metrics that are important to your organization.

Top 10 to "Try First"

with Copilot for Microsoft 365

Foundational skills for new users

1

Recap a meeting

– let Copilot keep track of key topics and action items so you can stay focused during the meeting and avoid listening to the recording after.

→ Draft an email with notes and action items from meeting

2

Summarize an email thread

– get quickly caught up to a long, complex email thread.

→ Click on the Summarize icon

3

Draft email

– personalize the tone and length.

→ Draft an email to [name] that informs them that Project X is delayed two weeks. Make it short and casual in tone.

4

Summarize a document

– get right down to business by summarizing long documents and focusing on the relevant sections.

→ Give me a bulleted list of key points from file

5

Tell me about a topic/project

– provide insights and analysis from across multiple sources to get up to speed quickly.

→ Tell me what's new about topic organized by emails, chats, and files?

6

Give me some ideas for ...

– boost your creativity with ideas for your work such as agendas, product names, social media posts, etc.

→ Suggest 10 compelling taglines based on file

7

Help me write ...

– jumpstart creativity and write and edit like a pro by getting a first draft in seconds.

→ Generate three ways to say [x]

8

What did they say ...

– when you vaguely remember someone mentioning a topic, have Copilot do the research.

→ What did person say about topic

9

Revise this content

– when you've got a rough draft of an idea, turn it into usable text and then vary the length and tone.

→ Rewrite with Copilot

10

Translate a message

– with business becoming increasingly international, it's important to be able to read or write messages in other languages.

→ Translate the following text into French:

Microsoft Copilot opportunity to impact key functional KPIs

[Sales opportunities pursued](#)

Simplifying and automating tasks like preparing for meetings, tracking tasks, sending emails, creating proposals, and researching customer and product information can allow sellers to pursue more opportunities.

[Close rate](#)

Improving the quality of marketing content and customer interactions such as emails and meetings can help to improve close rates.

[Deal Size](#)

Sellers can use Copilot to get suggestions for cross selling opportunities and then research a better together story. Copilot also assists in pulling together quotes and proposals.

[Customer retention](#)

Improving the quality of sales materials and interactions helps with retention, but the rest of the company can contribute as well from improved support interactions and first call resolution to improved customer feedback processes to product development.

Revenue growth

Cost savings and avoidance

Improve employee experience

KPI – Sales opportunities pursued

Sales is about building relationships and pursuing opportunities. But these things take time, so anything Microsoft Copilot can do to reduce the time sales teams spend on other tasks can be used to increase customer face time and pursue more deals.

How Microsoft Copilot can help increase the number of opportunities pursued

Improve customer meetings

- Research company information
- Learn how to pitch the product
- Organize information from past interactions
- Completely focus during the meeting

Respond to an RFP

- Create richer, faster responses to proposals
- Have Copilot assist with drafting and summarizing emails
- Simplify finding information for RFP responses

KPI – Close rate

Improving the quality of marketing content and customer interactions such as emails and meetings can help to improve close rates. In addition, improving targeting, pricing analysis, and creating effective promotions can also improve close rates.

How Microsoft Copilot can help improve the close rate

Improve quality of customer-facing materials

- Improve sales and marketing and content
- Create more compelling proposals and RFP responses
- Make emails and chats more impactful

Create a proposal

- Research market conditions
- Compare sales across regions or other variables

Improve targeting

- Analyze current product mix and cross sell success

Improve customer meetings

- Prepare for the meeting
- Focus during the meeting
- Generate follow up communications

Prompt Copilot for a summary of past interactions and customer details. Copilot for Sales enriches the summary with CRM insights.

Benefit: **Rapidly get up to speed and improve preparation** to focus on key issues and concerns. Have additional time to identify cross sell opportunities.

[Try in Copilot Lab: Prep for that meeting](#)

Use Copilot in PowerPoint to generate a presentation for the meeting using branded templates. Copilot can summarize important topics and customer requests from meeting transcripts.

Benefit: **Using higher quality presentations** makes it easier to convey a clear message and can reduce the time to close the deal.

[Try in Copilot Lab: Create presentations](#)

Copilot in Teams helps improve the quality of customer meetings by taking notes, suggesting talking points, and surface customer and product information during the call. Copilot for Sales includes sales keywords and KPIs in the meeting recap.

Benefit: **Having a better discussion** during the call can help to raise and resolve issues quicker, leading to increased customer satisfaction and potentially reduce the time to close the deal.

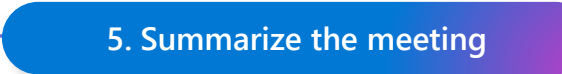

[Try in Copilot Lab: Generate ideas](#)

Have Copilot turn the meeting notes and action items into a follow up email. Copilot for Sales includes product and pricing details in the email from your CRM system.

Benefit: **Document and socialize** the action items to keep the sales process moving forward towards a successful close.

Review the meeting recap from Copilot in Teams for key points and action items. Use Copilot for Sales to update the opportunity details in your CRM system.

Benefit: **Avoid listening to meeting recordings** and spend that time improving the proposal.

[Try in Copilot Lab: Summarize meetings and videos](#)

During the meeting, Copilot suggests questions to ask the customer. Copilot for Sales provides sales insights like brand and competitor analysis.

Benefit: **Keep the conversation flowing** onto meaningful topics can help to cover the agenda quicker and reduce meeting times.

1. Gather customer feedback

Use Microsoft Copilot to summarize customer interviews, email interactions, and documents about product feedback, enriched with data from your Customer Data Platform with Copilot Studio.

Benefit: **Be present** during your customer interview by relying on Copilot to summarize feedback points and takeaways.

2. Continue the conversation

Use Copilot in Outlook to send a timely and thorough follow up email, capturing your earlier interview notes.

Benefit: Thank customers by asking Copilot in Outlook to draft a response and drop in bullets from the Copilot meeting summary.

3. Identify themes

Use Copilot to identify feedback themes from across meeting summaries and notes. Create a follow up survey with Copilot in Microsoft Forms.

Benefit: Simply describe to Copilot the form you'd like to build, and a well-designed draft will be generated, making it easier than ever before to gather feedback.

6. Thank your stakeholders

Starting a new email, prompt Copilot in Outlook to draft a message to all key stakeholders with the results and path forward.

Benefit: **Save time** preparing emails with Copilot as your drafting partner.

5. Share results

Use Copilot in PowerPoint to create a slide deck to share with the leadership and engineering teams. Use Copilot in Teams to capture action items and feedback.

Benefit: **Creating a presentation** makes it easier to convey a clear message especially when it's critical feedback on your product.

4. Analyze data

Use Copilot in Excel to sort and analyze data gathered from the surveys and website metrics.

Benefit: **Identify insights** with Copilot in Excel.

1. Learn about your customer

Use Microsoft Copilot to gather market research data to better understand your customer - enriched with data from your Customer Data Platform with Copilot Studio.

Benefit: **Rapidly get up to speed** to focus on key issues and concerns. Have additional time to identify key pain points for customer.

2. Craft your positioning

Leverage those insights to draft a strategy document for brand awareness using Copilot in Word.

Benefit: **Speed the time to a first draft** and then leverage Copilot to make any necessary revisions.

3. Pitch your plan

Use Copilot in PowerPoint and Teams to present your plan to the leadership team and summarize the meeting action items to ensure a successful product roll-out.

Benefit: **Improve the quality of your meetings** by relying on Copilot to keep track of action items so you can stay focused.

6. Craft Press Release

Using Copilot in Word craft a compelling press release about the new product and its value proposition for customer.

Benefit: **Save time** preparing communications with Copilot as your drafting partner.

[Try in Copilot Lab: Craft press release](#)

5. Prepare your team

Use Copilot in Outlook to draft an email to your stakeholder group leveraging content from the strategy document and Loop.

Benefit: **Turn a few bullet points into a professional email** with options for length and tone.

[Try in Copilot Lab: Write a product-launch email](#)

4. Develop your assets

Use Copilot to see what assets are currently available, pulling from your asset repository. Use Copilot in Loop to collaborate on branding elements that are still needed.

Benefit: **Improve your creativity** by prompting Loop in Copilot to "Brainstorm a list of creative ways to introduce our new product to customers."

1. Analyze customer conversations

Use Copilot Studio to build a custom copilot to the CRM system. Prompt Copilot¹ to review customer interactions including chat logs, emails and support tickets to identify recurring issues, patterns, and common themes.

Benefit: **Quickly summarize** recent customer conversations to get up to speed faster.

2. Identify the root cause

Ask Copilot¹ to analyze CSAT feedback / support conversations and compare to historical resolution data to better understand the underlying reasons for customer contacts.

Benefit: **Easily summarize data and highlight trends** to save time and surface root issues more quickly.

3. Leverage Copilot’s insights

Have Copilot analyze specific behavior, words, or phrases that may lead to negative responses from customers.

Benefit: **Accelerate key insights** by surfacing key words and related outcomes.

6. Share the solution

Copilot in Outlook can rapidly pull from your documents to draft an email detailing the root cause and solution steps.

Benefit: **Document and socialize** the solution to keep Customer Service teams moving forward towards successful interactions.

5. Implement solutions and training

Based on discussions with leadership and product teams, use Copilot in Word to rapidly update FAQs, scripts, knowledge articles, and best practices documents.

Benefit: **Rapidly update training documents** with the outcomes of your insights and meetings.

4. Collaborate with Teams

Using Copilot in Teams, to present findings to customer service and product teams. Copilot can recap the meeting and draft recommendations for process and product improvements.

Benefit: **Save time** by using Copilot summaries as a starting point for project milestones and status updates.

¹Access Copilot at copilot.microsoft.com or the Microsoft Copilot mobile app and set toggle to “Web”.
²Access Copilot at copilot.microsoft.com, the Microsoft Copilot mobile app, or the Copilot app in Teams, and set toggle to “Work”.

1. Review customer request

Use Copilot to summarize the customer request, products involved, past interactions, historical resolution data, and specific needs the customer may have all in a single interface.

Benefit: **Summarize** all the emails and Teams chats in the past month from customer highlighting the primary asks and any previous issues.

2. Start a new work order

Copilot can tie directly to your CRM to begin drafting a work order based on the customer request.

Benefit: **Easily populate a work order** with the existing customer information.

3. Match a technician

Copilot pulls key requirements to help match a technician based on issue complexity and agent availability.

Benefit: **Identify the best technician** given the customer's specific needs and location.

6. Continuous monitoring

Use Copilot in Excel to rapidly analyze data related to field service activity such as number of customer visits and total route times.

Benefit: **Stay on top of trends** by analyzing field success metrics and identify any trends that require further investigation.

5. Send customer survey

At the completion of service, use Copilot in Outlook to quickly update the feedback survey request and send it to the customer.

Benefit: **Quickly update and send the survey** with specific contextual updates for the customer.

4. Confirm the schedule

Once the workorder has been submitted with an ideal field technician, use Copilot in Outlook to confirm the schedule with the customer.

Benefit: **Rapidly draft an email** confirming the service date and contact details.

¹Access Copilot at copilot.microsoft.com or the Microsoft Copilot mobile app and set toggle to "Web".
²Access Copilot at copilot.microsoft.com, the Microsoft Copilot mobile app, or the Copilot app in Teams, and set toggle to "Work".

1. Recap daily activity

Prompt Copilot to summarize email threads and meetings from the past day and identify key actions and issues.

Benefit: **Rapidly get up to speed** to focus on key issues and concerns.

2. Review performance

With Copilot in Excel, review the performance of Service Agents by analyzing data, identifying insights, and automating tasks based on historical interactions and business processes.

Benefit: **Identify insights** with Copilot in Excel.

3. Discuss with the team

With Copilot in Teams, meet to discuss trends and issues while focusing on the meeting and letting Copilot in Teams take notes and record critical items for you.

Benefit: **Dedicate your focus to the meeting** while Copilot focuses on capturing the notes.

6. Update procedures and socialize

Using the notes from the leadership team meeting, make rapid updates to policies and procedures using Copilot in Word. To socialize these changes, Copilot in Outlook can draft an update email to the org.

Benefit: **Save time updating documents** and preparing emails with Copilot as your drafting partner.

5. Meet with LT

Review the presentation with the leadership team and record feedback and goals. With Copilot in Teams, you can focus on the meeting and utilize the notes to recap key items.

Benefit: **Dedicate your focus to the meeting** while CoPilot focuses on capturing the notes.

4. Create an LT presentation

Based on the data analysis and the feedback from the team, use Copilot in PowerPoint to rapidly create a draft presentation to update the leadership team.

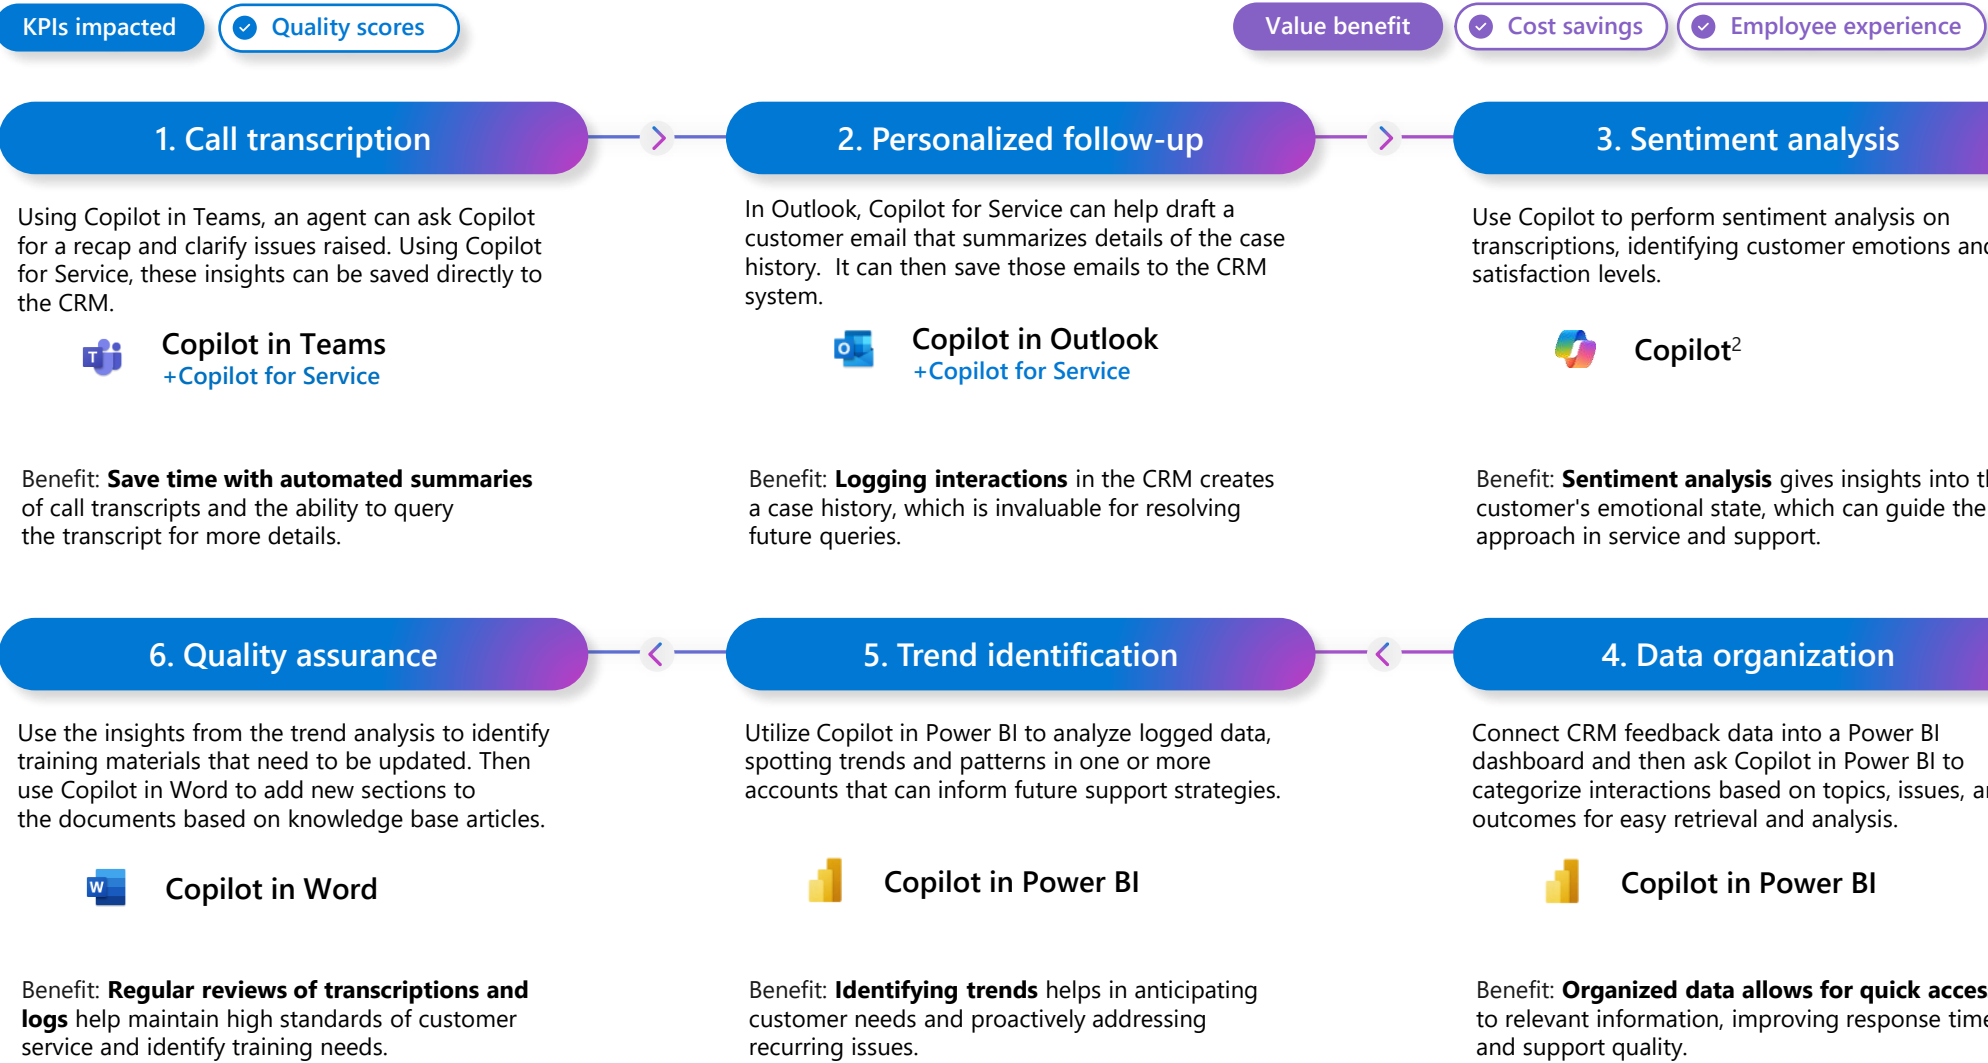

Benefit: **Creating a presentation** makes it easier to convey a clear message especially when it's critical feedback.

Analysis and communications

8:00 am

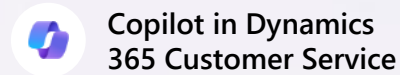

Back from her daily school run for her three kids, Mayte gets ready to kick off the day by asking Copilot to summarize the emails and Teams chats she received since she went offline the day before, and her agenda for the day

Example prompt: **Summarize** all the emails and Teams chats since yesterday 8pm CET and all the meetings scheduled for today.

8:15 am

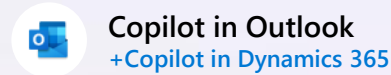

One of the emails she received overnight is a request for support in an executive escalation. Mayte goes into Copilot in Dynamics 365 to gain insights on the specific support case to ensure she can provide effective guidance and solutions.

Action: **Case summarization (Summary)** feature in Copilot in Dynamics 365 provides a summary of all the case history and actions taken to-date.

9:00 am

Ready to reply, Mayte uses the summary generated by Copilot in Dynamics 365 Customer Service and drafts an email with Copilot in Outlook with an executive summary and next steps.

Action: **Draft and Coaching in Copilot** features in Copilot in Outlook help draft and provide coaching feedback to improve communications.

4:00 pm

As an AI enthusiast, Mayte asks Copilot to suggest interesting readings and emerging news from the AI world and the industry to stay informed and ahead of trends, enabling her to innovate and apply the latest insights in her interactions.

Example prompt: **Suggest** the most interesting news and articles about AI in the last week

2:00 pm

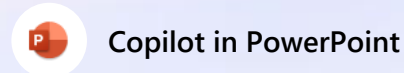

It's time to prepare the Monthly Business Review for her org, so she uses Copilot in Excel to generate some great charts to create charts and show trends in the Key Performance Indicators (KPIs) for her teams, and present in the business review.

Action: **Quickly get to data insights** and visualize the data.

11:00 am

Mayte is preparing a presentation for a customer event next week. She has been gathering input from peers, quotes and her own remarks in Word, and now it's time to build a PowerPoint presentation out of it.

Example prompt: **Create a presentation** based on this Word file [add the link to the Word doc in her One Drive]

Copilot can be extended into ERP systems and other processes to bring data together and speed decision-making without performing expensive updates to financial systems.

[Outsourcing spend](#)

Automate simple tasks that may currently be outsourced or performed by low-level employees.

Revenue growth

Cost savings and avoidance

Improve employee experience

KPI – Outsourcing spend

As a cost center, Finance teams face the challenge of constantly achieving more with fewer resources. By assisting with everyday tasks, Microsoft Copilot can help increase time for additional analysis, proactive audits, collections processes, and financial reporting.

How Microsoft Copilot can reduce finance department spending

Keep communication lines open

- Draft communications such as approval requests, status emails, and supplier communications
- Summarize stakeholder meetings around budget status and approvals
- Create sourcing strategy decks

Reduce outsourcing requirements

- Assist with manual tasks allowing processes to be done internally

Avoid spend on finance system updates

- Extend financial systems with Copilot
- Extrapolate the risk and degree of impact by accessing customer data and distribution records to identify patterns for corrective change

KPIs impacted ☒ Outsourcing spend

Value benefit ☒ Cost savings ☒ Employee experience

1. Payment reconciliation

In Excel, use Copilot for Finance to gather financial data from SAP or Dynamics 365 to reconcile data entries across systems.

Benefit: **Create a unified view** of financial information that is crucial for accurate analysis.

2. Natural language queries

Use Copilot with a connector to the financial system to directly query data for deeper insights.

Benefit: **Allow users to interact with financial data** intuitively, making complex data analysis more accessible.

3. Risk assessment

Leverage Copilot to inquire about any potential risks due to recent regulatory changes around privacy and local laws.

Benefit: **Identify potential risks**, providing insights that enable proactive risk management.

6. Decision support

After the meeting, summarize the leadership team’s feedback using Copilot in Teams and then use Copilot in Word to quickly update policy documents.

Benefit: **Model financial outcomes** based on various scenarios, providing valuable support for decision-makers.

5. Reporting

Turn the Word document into a PowerPoint presentation for a leadership team meeting.

Benefit: **Quickly create presentations** using Copilot to make a first draft.

4. Insight generation

Use Copilot in Word to generate a white paper on new regulatory risks and recommended responses including charts generated by Copilot in Excel.

Benefit: **Create clear financial reports**, saving time and ensuring that key insights are communicated effectively.

★ Conducting more audits

8:00 am

Shali starts her day using Microsoft Copilot to catch up on action items from the previous day. She also asks Copilot to prepare her for her upcoming meeting.

Copilot²

Example prompt: **Help me prep for my upcoming meetings I have today;** including action items from the meeting. Draft follow up meeting agenda from meeting.

9:30 am

Shali later starts drafting a proposal for senior leadership review using the Meeting Recap and relevant files. She asks Copilot in Word to revise the draft to be more concise.

Copilot in Word

Example prompt: **Write a project proposal** using meeting notes in concise tone. List the pros and cons of solution from meeting notes. Visualize as a table.

10:00 am

Shali updates the reporting for stakeholders. She asks Copilot in Power BI to create an Intro tab and additional insights tab for her to explore other ideas.

Copilot in Power BI

Example prompt: **Create a page to monitor the project scheduled hours,** resource availability, and identify any gaps or overloads. Create DAX measure in Suggestions with Copilot.

4:00 pm

Shali uses Copilot in Outlook to summarize new emails and draft the project status update emails to the stakeholders.

Copilot in Outlook

Example prompt: **Summarize the email** and reply to confirm action items. Coaching with Copilot.

2:00 pm

She uses Power Apps to collect insights from various sources either text input or uploaded files. She asks Copilot in Power Apps to first suggest relevant fields then create an app based on the ask.

Copilot in PowerApps

Example prompt: **Create an app to collect insights** from files or text input box. Add a screen to display all insights with dropdown boxes on submitter.

11:00 am

After reviewing the reporting, Shali wants to set up automated alerts for potential overloads. She asks Copilot in Power Automate to create a flow to automate the process and analyze the automation activities.

Copilot in Power Automate

Example prompt: **Write a SQL query to list all the audit projects** in FY24. Create an automate flow that send alerts to users about Power BI reporting. Ask Copilot about which flow had the most run failures today?

Shali

Copilot scenarios for HR

Copilot scenarios for HR

Overview and KPIs

KPIs play a crucial role in organizations, providing a compass to navigate toward success. Let's dive into KPIs for Human Resources and how Copilot can assist.

Use case by role

Copilot can simplify the tasks that HR employees perform every day. Look at key use cases and how Copilot can be your AI assistant along the way.

Day in the life

See how real-life HR employees are using Copilot in their day-to-day.

Using Copilot in HR

Goals and challenges

With changing worker expectations, multi-generational workforces, and hybrid workplaces, it's becoming harder to keep talented people. Copilot can help to simplify access to data, improve quality and increase creativity, resulting in improvements to essential key performance indicators.

Copilot can assist with ...

Copilot helps you improve HR processes and access to information.

- [Streamline your recruiting process](#)
- [Managing internal job transitions](#)
- [Streamline benefits and compensation](#)

Microsoft Copilot opportunity to impact key functional KPIs

Cost per hire

Organizations can improve the hiring process by using Copilot to help write job descriptions, summarize interviews, avoid bias when identifying top candidates, improve candidate communications, and improve onboarding processes.

Employee turnover rate

Copilot can help all employees get more satisfaction in their job by assisting with challenging tasks, allowing them to work on higher value activities. It also makes many tasks faster, which can reduce overtime requirements.

Onboarding time

Speed time to value of new employees by simplifying access to information and training.

Revenue growth

Cost savings and avoidance

Improve employee experience

KPI – Onboarding time

Reducing ramp up time is beneficial for everyone. It boosts employee confidence and engagement. It helps shorten the learning curve allowing employees to make an impact sooner.

How Microsoft Copilot can help reduce onboarding time

Create onboarding materials

- Use Copilot to draft training guides
- Use Copilot to enhance employee handbooks

Improve onboarding process

- Generate onboarding documents and contracts
- Integrate relevant company policies and resources into the onboarding materials
- Draft check in emails to new hires to send during first 60 days on the job

Roles

Human Resource
Manager

Department
Manager

Microsoft AI solutions

Copilot for Microsoft 365
Microsoft Copilot

KPI – Employee retention

Reducing the stress of everyday tasks by using Microsoft Copilot to reduce complexity and save time can help to improve employee satisfaction, which has been shown to improve retention.

How Microsoft Copilot can help employee turnover rates

Save time

- Simplify processes and reduce mundane tasks
- Reduce stress by creating a first draft for difficult emails and documents
- Keep work organized
- Reduce overtime requirements

Foster a productive culture

- Draft and analyze employee surveys
- Improve benefit discoverability and usage
- Make internal announcements more impactful

Roles

Human Resource
Manager

Department Hiring
Manager

Microsoft AI solutions

Copilot for Microsoft 365
Microsoft Copilot

KPI – Support tickets handled by agents

Microsoft Copilot can help with self-service options for employees using HR systems which can reduce support requirements and increase employee satisfaction.

How Microsoft Copilot can help average resolution times

Boost productivity

- Rapidly find information
- Diagnose problems faster
- Check for similar issues and resolutions
- Quickly send follow-up communications

Custom Support Chatbots

- Custom Support Chatbots (Built with Copilot Studio)
- Develop AI-powered chatbots to handle inquiries.
- Program chatbots to answer FAQs

Roles

HR Service Manager
HR Service Agent

Microsoft AI solutions

Copilot for Microsoft 365
Copilot for Service

KPI – Average resolution time

Microsoft Copilot can help with lowering resolution times which in turn leads to increased productivity and higher employee satisfaction rates.

How Microsoft Copilot can help average resolution times

Boost productivity

- Rapidly research service interactions
- Create first drafts faster
- Check for similar issues and resolutions
- Quickly send follow-up communications

Reduce churn

- Address more queries in less time
- Personalize solutions
- Improve staff availability based on automated capacity-based scheduling
- Diagnose problems faster

Roles

Average resolution time can require input from:

HR Service Manager
HR Service Agent

Microsoft AI solutions

Copilot for Microsoft 365
Copilot for Service

KPI – Cost per hire

Copilot can help HR streamline the hiring process by assisting with writing job descriptions, conducting interviews and drafting communications to candidates.

How Microsoft Copilot can help with hiring

Improve quality of recruitment experience and materials

- Improve job descriptions
- Prepare for interviews
- Improve quality of emails and chats with candidates

Improve employee meetings

- Organize information from past interactions
- Completely focus during the meeting

Inform market research

- Draft candidate and new employee surveys
- Analyze surveys to gain valuable insights into what makes employees happy or areas that need improvement within the organization

Roles

Human Resource Manager

Department Hiring Manager

Microsoft AI solutions

Copilot for Microsoft 365

Microsoft Copilot

Microsoft Copilot Studio

KPI – Benefit usage

Create improved interfaces for employees to learn about their benefits and improve registration processes.

How Copilot can help increase benefit usage

Create HR benefit campaign

- Generate news and announcements from your HR team or department
- Communicate policies and procedures for HR-related matters, such as benefits, payroll, performance, and compliance

Improve the quality of benefit materials

- Create forms and workflows for HR-related requests such as leave, expense, feedback, and recognition
- Surface learning opportunities and resources for employees.

Improve benefits information sessions

- Use meeting recap
- Generate follow up communications

HR | Improve onboarding and development processes (Copilot for Microsoft 365)

¹Access Copilot at copilot.microsoft.com or the Microsoft Copilot mobile app and set toggle to "Web".
²Access Copilot at copilot.microsoft.com, the Microsoft Copilot mobile app, or the Copilot app in Teams, and set toggle to "Work".
The content in this example scenario is for demonstration purposes only. You should evaluate how Copilot aligns with your organization's business processes, regulatory requirements, and responsible AI principles.

1. Conduct market research

Use Copilot to research the latest industry trends and data regarding competitive job descriptions.

 Copilot¹

Example prompt: **Generate a table of key skills and experience required for software engineers** at a large enterprise technology company based on market trends and leading technology companies.

2. Create job description

Ask Copilot to create a job description which leverages the market research gathered.

 Copilot¹

Example prompt: **Generate a software engineer job description** that includes skills, qualifications, and responsibilities. Reference jobs at large, enterprise tech companies.

3. Identify potential candidates

Indicate keywords from your job description to surface potential candidates. Use Copilot to access HR system data using plugins built in Copilot Studio.

 Copilot²
+Copilot Studio

Benefit: **Rapidly identify possible candidates** which meet role job requirements reducing time spent from hours to minutes.

4. Create candidate slate

Draft a detailed view of potential candidates and insights so a hiring manager can easily evaluate candidates.

 Copilot in Word

Example prompt: **Summarize these candidates in a table format** with a pros column and a cons column.

5. Communicate potential candidates

Draft and send email to hiring manager sharing potential candidates and insights with them for consideration.

 Copilot in Outlook

Example prompt: **"Draft with Copilot"** an email to the hiring manager that summarizes the candidates and the key insights for hiring consideration. (Include the table from the Word document.)

6. Finalize candidate slate

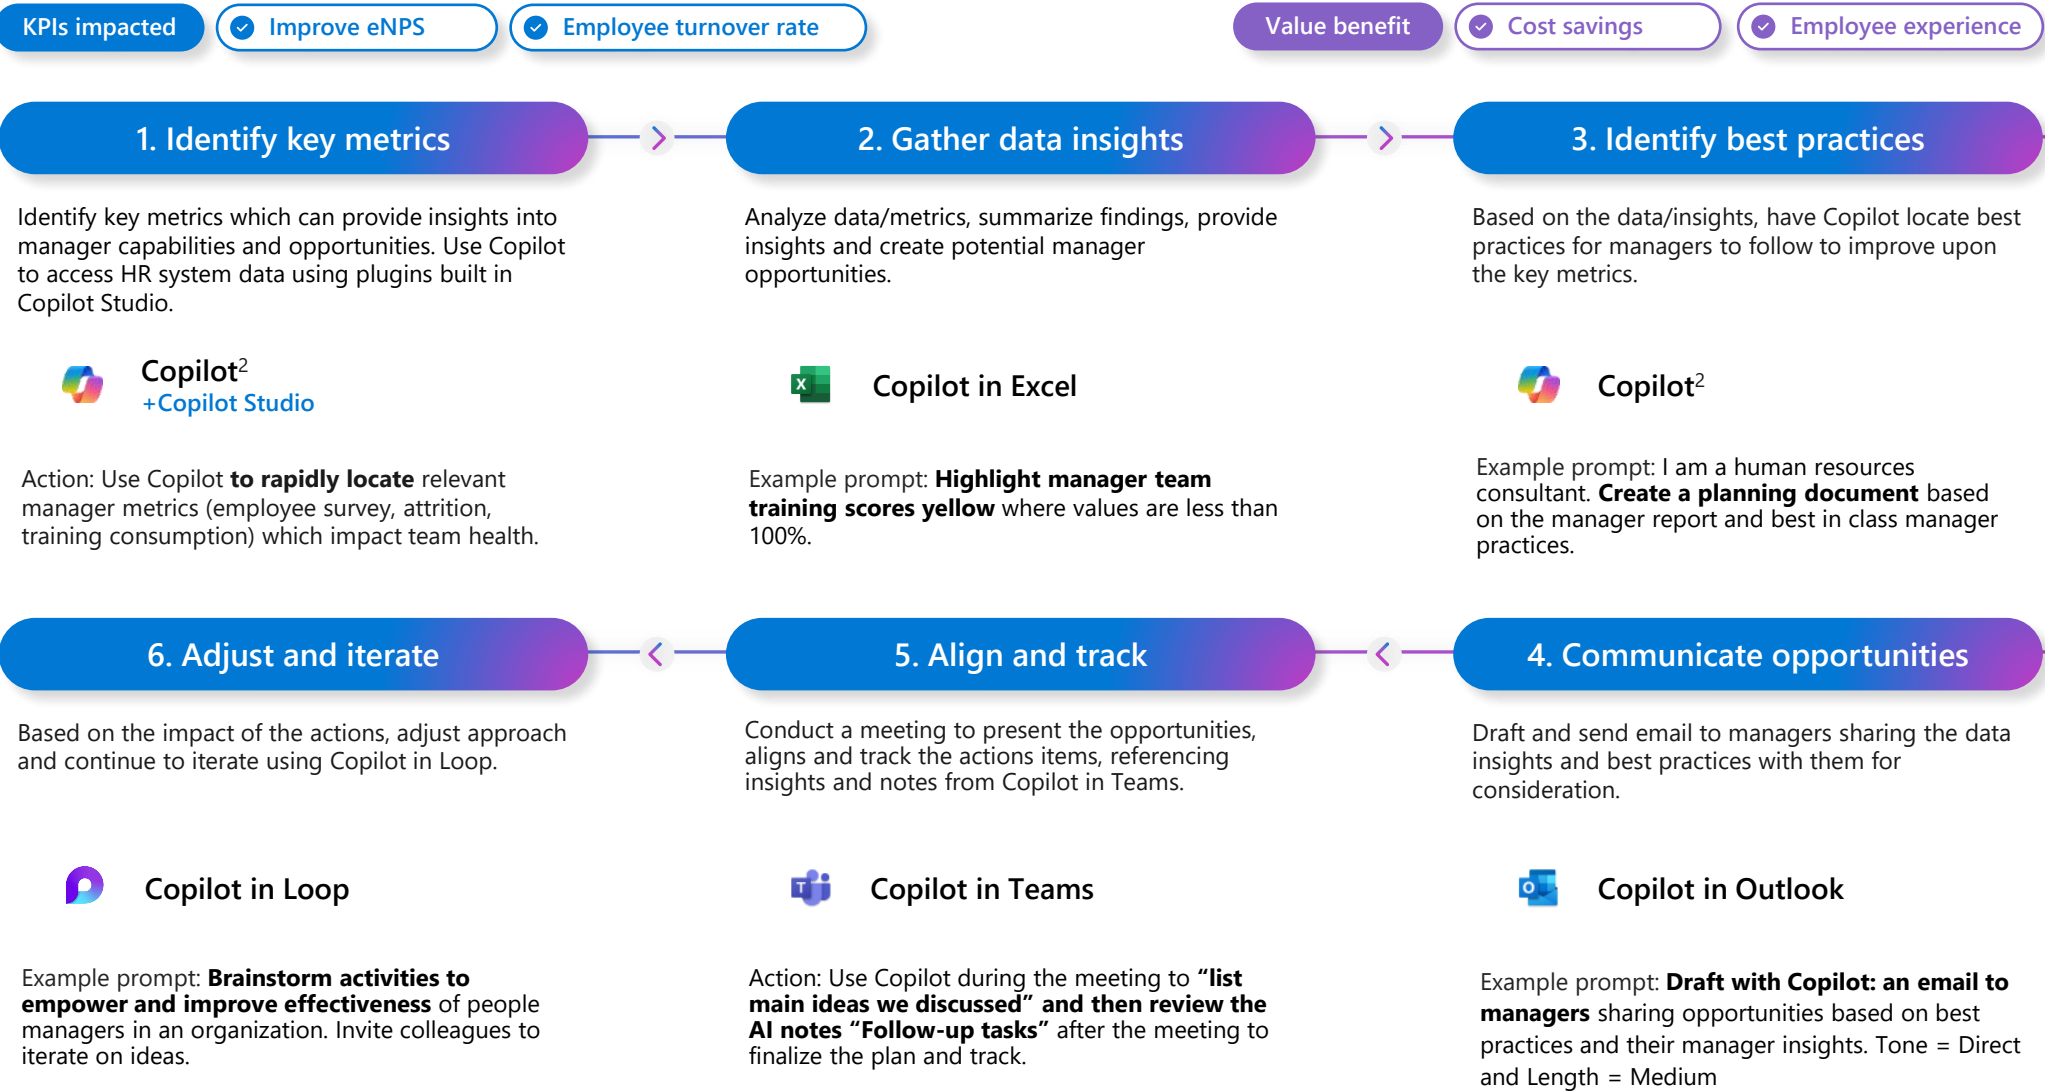

Engage with hiring manager to gain feedback on candidate slate and align on next steps.

 Copilot in Teams

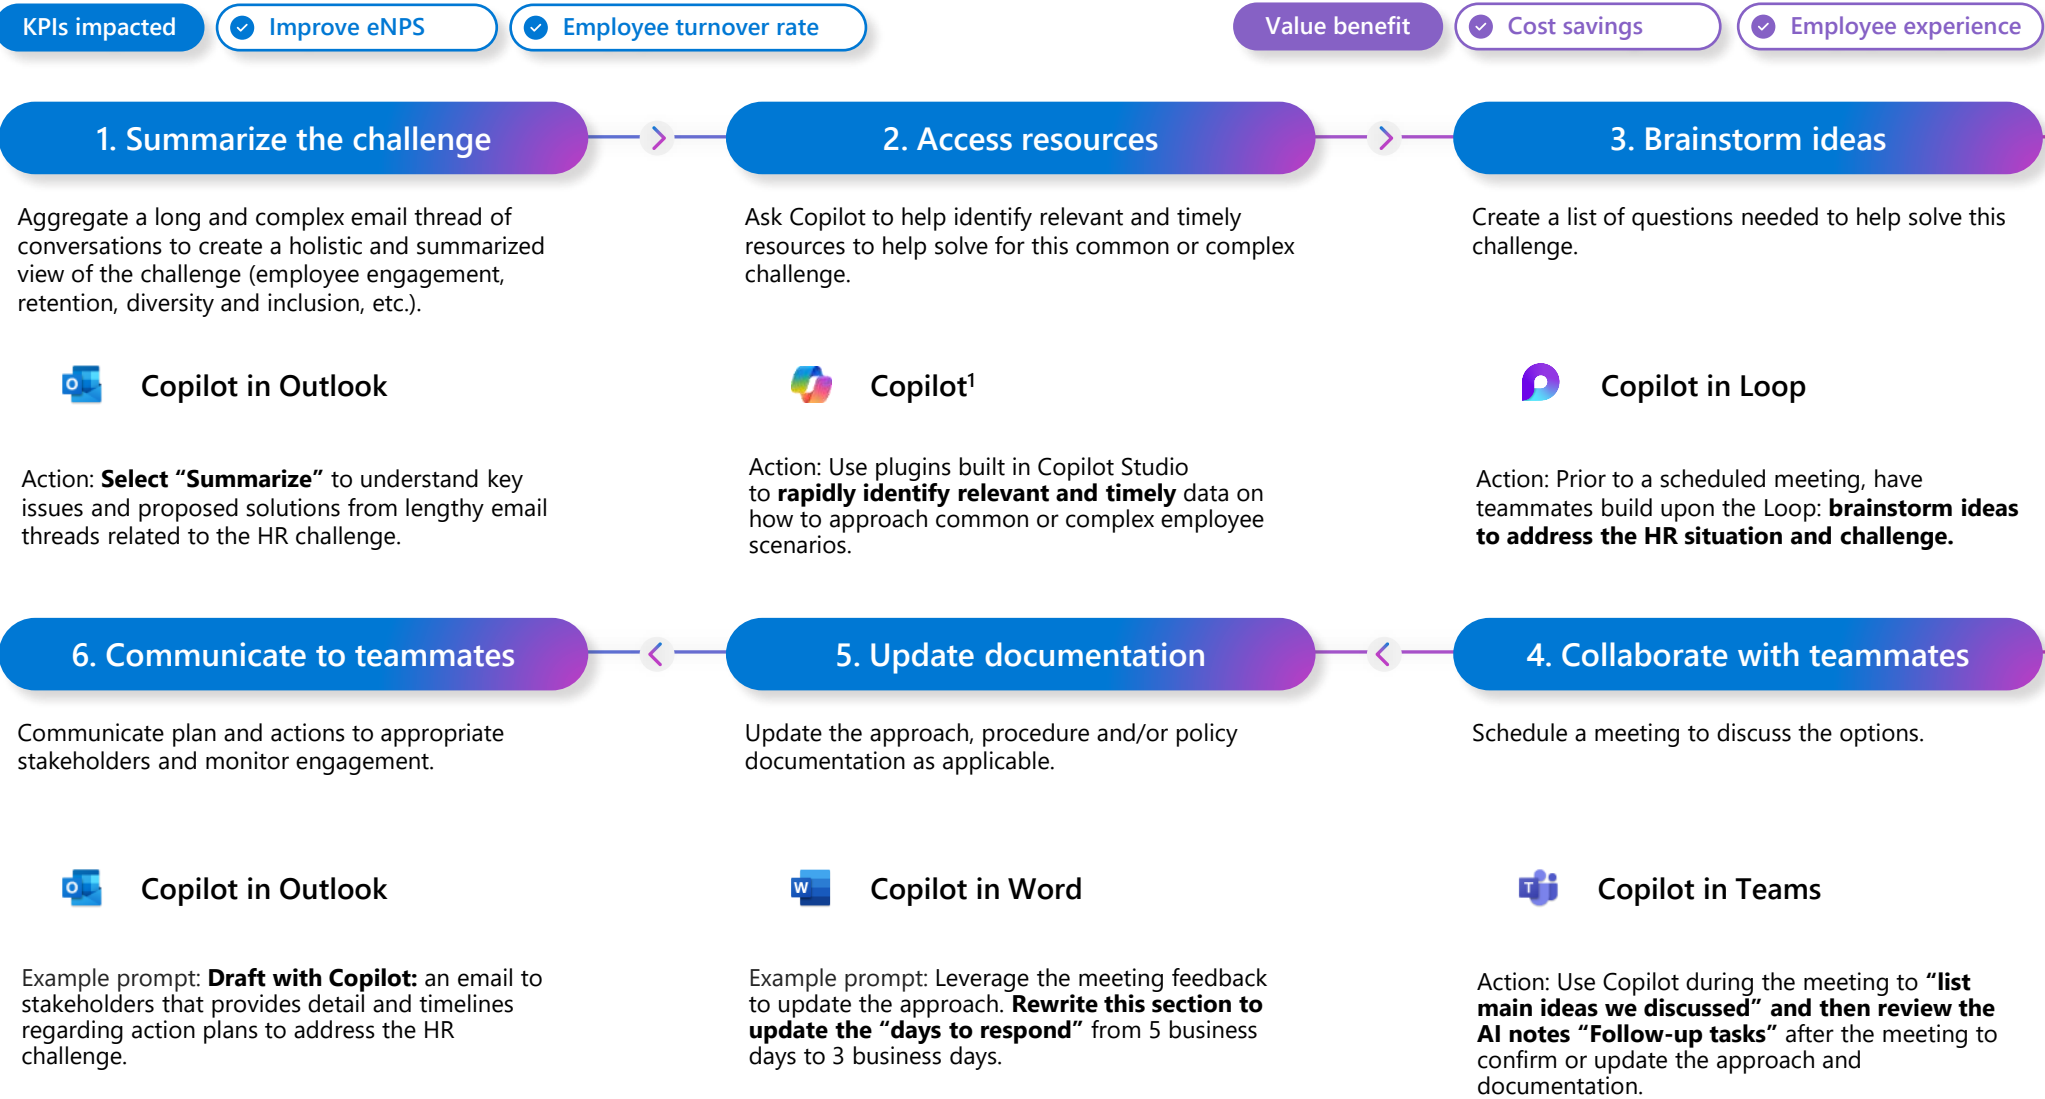

Actions: **"Recap the meeting"** to review key topics and **"List action items"**. Paste actions in the meeting chat and tag owners to confirm or update the candidate slate.

¹Access Copilot at copilot.microsoft.com or the Microsoft Copilot mobile app and set toggle to "Web".

HR | Update a policy document

- KPIs impacted
- ✓ Improve eNPS
- ✓ Employee turnover rate
- ✓ Increase benefit usage
- Value benefit
- ✓ Cost savings
- ✓ Employee experience

1. Identify changes in policy

Compare the new and old policy documents and make a table of the key policy differences. Have Copilot translate the results into local language.

 Copilot²

Example prompt: **Compare policies in these two documents** and make a table of the key policy differences. Translate the results to Spanish.

2. Draft new FAQ

Create a new FAQ document that explains the changes and explores what impact it may have on employees and what concerns they might have.

 Copilot in Word

Example prompt: **Make a list of likely questions** that employees will have about this change in policy and provide answers to each question based on the policy document.

3. Create plan

Ask Copilot to create a plan for change management that updates curated content, employee-facing material, and advisor training and communications

 Copilot²

Example prompt: Using the insights from the previous step, prompt Copilot: I am a human resources support advisor. **Create a change management plan** based on the updated policy. Include tasks and timelines.

6. Continuous improvement

Communicate changes to Support Advisors and monitor impact/feedback.

 Copilot in Outlook

Example prompt: **Draft with Copilot:** a reply email to the department that provides detail and timelines regarding improvements and changes.

5. Collect feedback

Engage with support advisors to depict the data, plan, actions and support material required to implement the new policy.

 Copilot in Teams

Example prompt: Use Copilot during the meeting to “**list main ideas we discussed**” and then **review the AI notes “Follow-up tasks”** after the meeting to confirm or update the approach and documentation.

4. Develop material

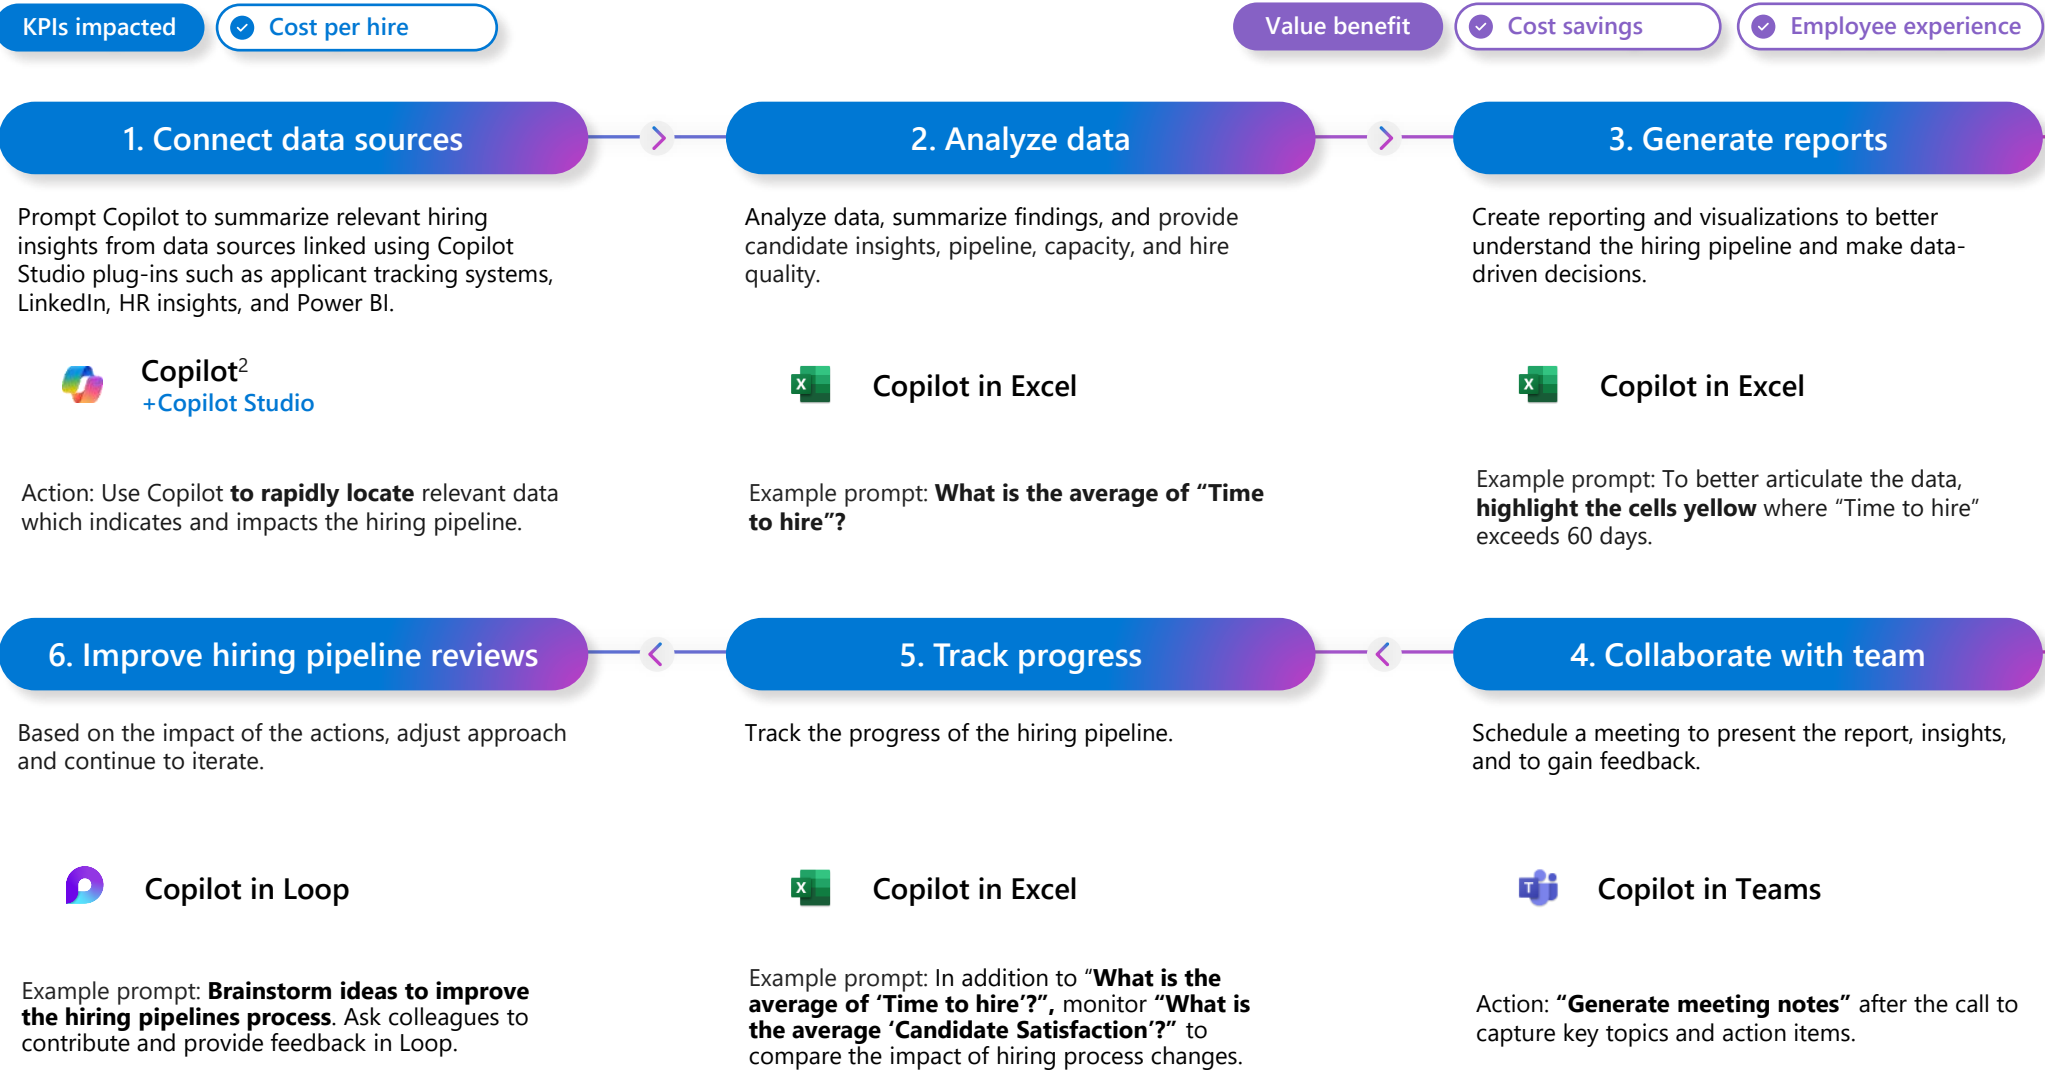

Build training materials which are tailored to the case and employee/role.

 Copilot in PowerPoint

Example prompt: **Create a presentation from file** [plan.docx] and relevant documents about [insert case] to train Human Resources support advisors on applying the new policy.

¹Access Copilot at copilot.microsoft.com or the Microsoft Copilot mobile app and set toggle to “Web”.
²Access Copilot at copilot.microsoft.com, the Microsoft Copilot mobile app, or the Copilot app in Teams, and set toggle to “Work”.
The content in this example scenario is for demonstration purposes only. You should evaluate how Copilot aligns with your organization’s business processes, regulatory requirements, and responsible AI principles.

1. Connect data sources

Prompt Copilot to summarize relevant hiring insights from data sources linked using Copilot Studio plug-ins such as applicant tracking systems, LinkedIn, HR insights, and Power BI.

 Copilot²
+Copilot Studio

Action: Use Copilot **to rapidly locate** relevant data which indicates and impacts the hiring pipeline.

2. Analyze data

Analyze data, summarize findings, and provide candidate insights, pipeline, capacity, and hire quality.

 Copilot in Excel

Example prompt: **What is the average of "Time to hire"?**

3. Generate reports

Create reporting and visualizations to better understand the hiring pipeline and make data-driven decisions.

 Copilot in Excel

Example prompt: To better articulate the data, **highlight the cells yellow** where "Time to hire" exceeds 60 days.

4. Collaborate with team

Schedule a meeting to present the report, insights, and to gain feedback.

 Copilot in Teams

Action: **"Generate meeting notes"** after the call to capture key topics and action items.

5. Track progress

Track the progress of the hiring pipeline.

 Copilot in Excel

Example prompt: In addition to **"What is the average of 'Time to hire'?"**, monitor **"What is the average 'Candidate Satisfaction'?"** to compare the impact of hiring process changes.

6. Improve hiring pipeline reviews

Based on the impact of the actions, adjust approach and continue to iterate.

 Copilot in Loop

Example prompt: **Brainstorm ideas to improve the hiring pipelines process.** Ask colleagues to contribute and provide feedback in Loop.

¹Access Copilot at copilot.microsoft.com or the Microsoft Copilot mobile app and set toggle to "Web".

²Access Copilot at copilot.microsoft.com, the Microsoft Copilot mobile app, or the Copilot app in Teams, and set toggle to "Work".

The content in this example scenario is for demonstration purposes only. You should evaluate how Copilot aligns with your organization's business processes, regulatory requirements, and responsible AI principles.

HR | Automate benefits query management

KPIs impacted

✓ Turnover rate

✓ Onboarding time

Value benefit

✓ Cost savings

✓ Employee experience

1. Create a chatbot

Create a custom copilot accessing HR information in Microsoft Graph with guided prompts around employee benefits. Once ready, launch it as an app in Microsoft Teams for your organization.

Benefit: **Streamline the benefits inquiry process** with instant, 24/7 chatbot assistance.

2. Benefits analysis

Employees may ask the chat bot for more details about specific benefits.

Benefit: **Match employee criteria** with the best available benefits packages.

3. Recommendation

Employees can provide the chat bot with desired outcomes and ask Copilot to pull specific benefits recommendations.

Benefit: **Providing tailored recommendations** helps employees make informed decisions about their benefits.

6. Reporting

Use Copilot in Word to help draft a report on employee sentiment regarding resources, benefits, and potential improvements.

Benefit: **Reporting on trends and satisfaction** helps HR to continually improve the benefits offerings.

5. Administration assistance

Leveraging the feedback collected, use Copilot in Word to update employee resources and knowledge bases.

Benefit: **Streamlining the administration process** reduces HR workload and improves accuracy.

4. Feedback collection

Use the chat bot to automate the feedback collection in a database for analysis.

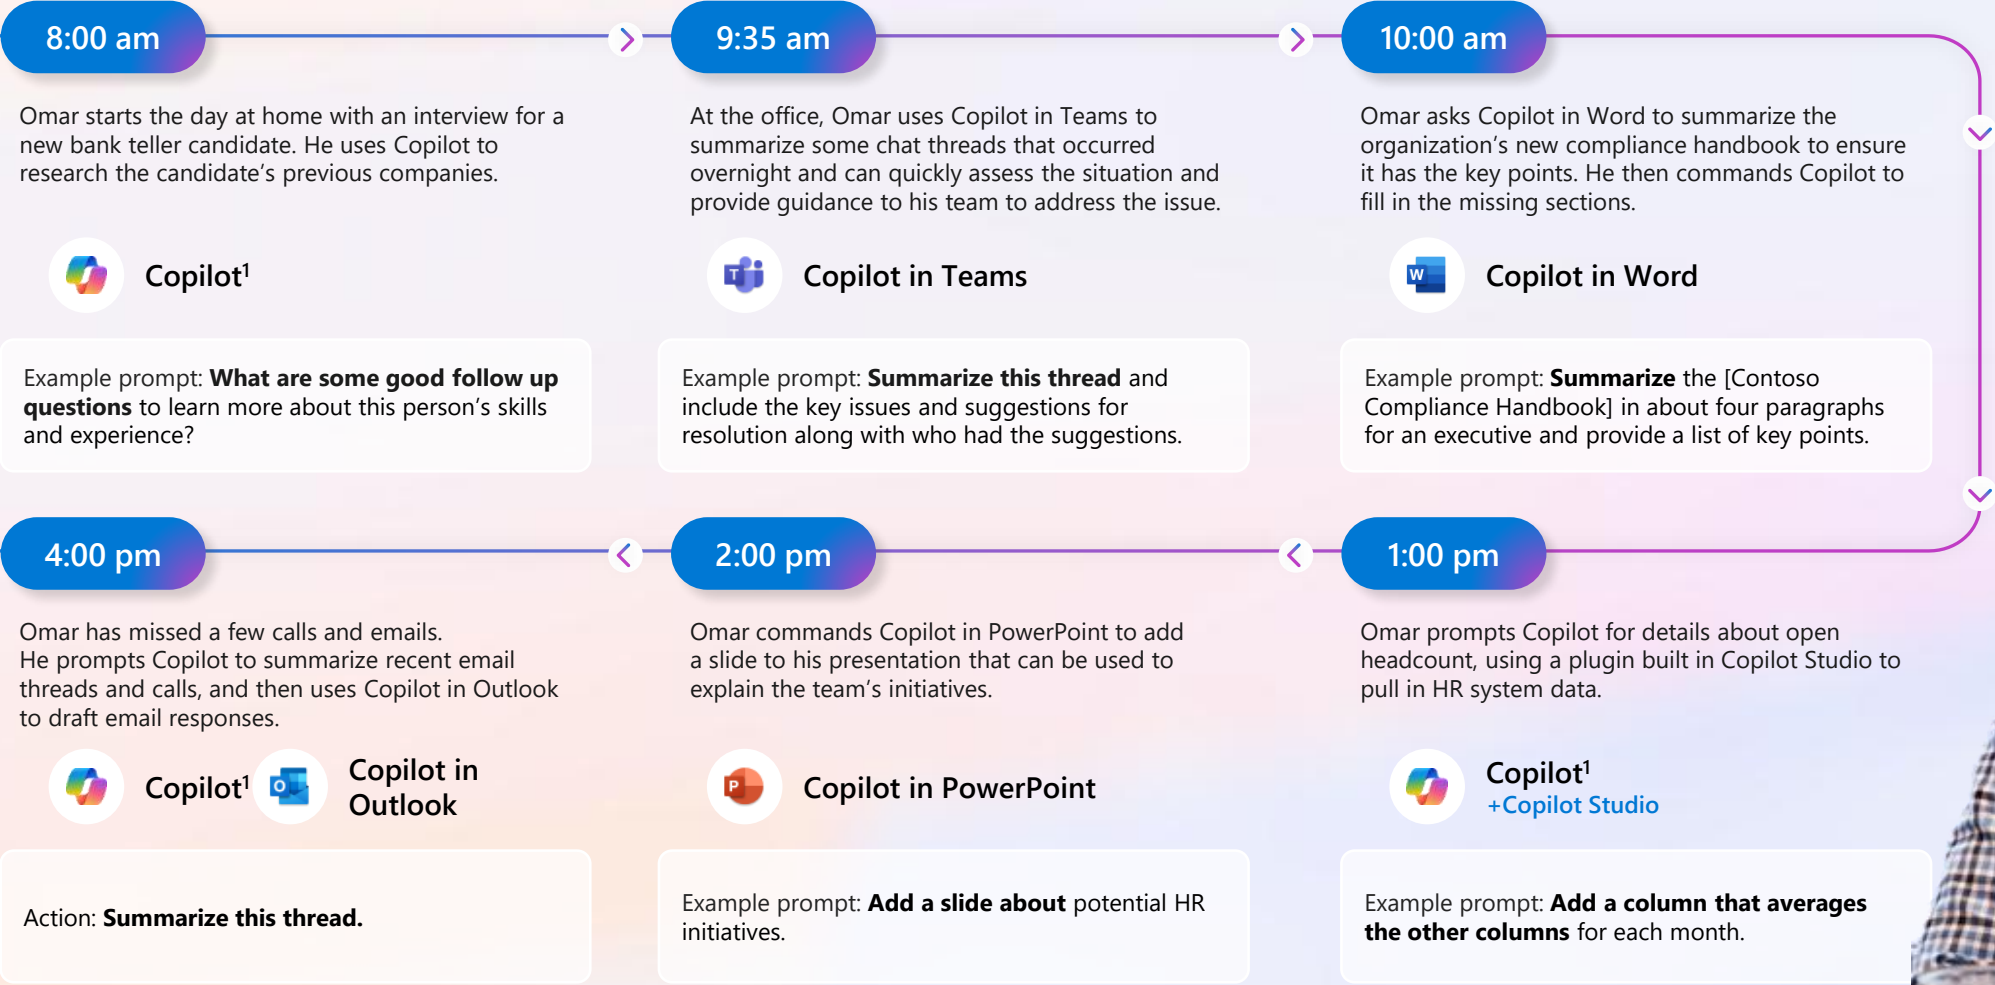

Benefit: **Gathering feedback** allows for the refinement of the recommendation process.

A day in the life of a HR Senior Service Manager at Microsoft

Available with:

Copilot for Service (includes Copilot for Microsoft 365)

Scenario level: ● ● ●

Benefits

⌚ ~6 hours per week

🔄 Areas of investment: Learning & new initiatives

★ Better communication & higher self confidence

9:00 am

Andrea starts her day going through her email. There are couple of long messages, and she asks Copilot to give her a summary of those and highlight urgent topics and activities.

Copilot in Outlook

Example prompt: Please give me a **summary of this email** and highlight any marked as urgent or important.

9:30 am

During the monthly service delivery review, Andrea uses Copilot to give her summary of the discussion per service line, and at the end of the meeting, she asks for the meeting notes and action points.

Copilot in Teams

Example prompt: Please **summarize last 10 minutes** of the discussion. Please **create meeting notes** and **actions assigned** to me.

1:00 pm

Andrea missed several conversations during the long call. She asks Copilot to summarize all the pings she has received and create a list of action items.

Copilot in Teams

Example prompt: Please summarize all my messages received via Microsoft teams for the last 3 hours and **create a list of any action items** for me.

4:00 pm

The last hour of the day, Andrea spends time analyzing the CARE audits her managers performed over the last month. She asks Copilot to give her the key points and themes and create an action list.

Copilot¹

Example prompt: Please **give me the key points and themes** from the document [careauditapril.xlsx] and create a list of any action items for me.

3:00 pm

Andrea must organize a readiness session for the HR Advisory team on an updated benefits policy introduced in UK. She uses Copilot in PowerPoint to create slides out of the word document.

Copilot in PowerPoint

Example prompt: **Create a presentation** using [Word document] including speakers notes for each slide. After that Andrea uses Designer function to select the right design for each slide.

2:00 pm

Andrea asks Copilot to summarize all activities related to a new case, as well as to check the knowledge base articles to understand the policy.

Copilot²
+Copilot for Service

Example prompt: **Find a case and click on summarize** the case function. After that she uses Ask the question function and finally ask Copilot to help writing the answer.

Copilot scenarios for Manufacturing

Copilot solutions in Manufacturing

Goals and challenges

The manufacturing industry requires a steady flow of raw materials while managing costs and minimizing production disruptions. Manufacturers look for opportunities to drive innovation and operational excellence while balancing operational costs amid rising prices. Finding ways to increase efficiency, supply chain management, and streamline the design-to-make process.

Demos to see how Copilot can help

Copilot assists manufacturing organizations with numerous tasks that impact critical areas like contract management, design-to-make process, and factory asset management.

- [Simplifying tasks for plant employees](#)
- [Contract lifecycle management](#)
- [Optimizing asset management](#)
- [New product ideation and research](#)
- [Supplier RFP](#)
- [Recall management](#)
- [Supplier quality optimization](#)

Manufacturing roles

Supply Chain Manager

Product Designer

Process Engineer

Production Manager

Microsoft Copilot opportunity to impact key functional KPIs

Minimize production downtime

Minimize production downtime by using Copilot to analyze information from manufacturers apps to predict and prevent equipment failures, manage inventory levels, optimize process efficiency, and identify training that can help staff keep machines operating.

Supply chain performance

Use AI insights to run just-in-time (JIT) inventory systems. Use AI to generate evaluation criteria for new materials and suppliers. Effectively summarize and share quality information with suppliers. Review contracts to make the most effective deals and use AI analysis to evaluate supplier performance.

Scrap rate

Quickly identify quality issues by accessing and analyzing quality logs to stay ahead of maintenance issues. Accurately document production issues and collaborate with manufacturers to precisely adjust equipment tolerances. Reduce the cost of any recall programs that are required with effective management and tailored responses.

Customer satisfaction

Create effective customer listening campaigns. Improve customer service performance with tailored LLMs for higher first-time call resolution. Refine customer communications whether through enriched writing or enhanced call scripts.

Employee turnover

Retain critical plant and headquarters staff by improving the work/life balance of all workers by simplifying overhead tasks like signing up for HR benefits. Improve skilling to provide more growth opportunities and increase internal hiring.

Revenue growth

Cost savings and avoidance

Improve employee experience

Copilot scenarios for Retail

Copilot solutions in Retail

Goals and challenges

The retail industry plays a significant role in the global economy and is impacted by spending patterns, economic conditions, and global inflation. Their focus is on improving inventory management and efficiency, optimizing their supply chain, analyzing and monitoring inventory and forecasts, and hiring and retaining frontline workers.

Demos to see how Copilot can help

Copilot assists retail organizations with numerous tasks that impact critical areas like store performance, supply chain, and market campaigns.

- [Maximize store performance](#)
- [Optimize supply chain management](#)
- [Improve merchandising decisions](#)
- [Streamline market research and strategy](#)
- [Track marketing campaign performance](#)
- [Craft targeted marketing campaigns](#)
- [Improve customer service & info discovery](#)
- [Create personalized shopping journeys](#)

Retail roles

Store Operations Manager

Merchandise Buyers and Planners

Supply Chain Manager

Marketing Manager

Microsoft Copilot opportunity to impact key industry KPIs

Improve store revenue

Provide real-time monitoring of sales, inventory, customer feedback, and staff performance across different locations and/or channels by leveraging data from various sources to quickly gain and communicate actionable insights and recommendations to help optimize operations and increase sales.

Boost customer satisfaction

Streamline processes that lead to greater customer satisfaction, from analyzing multiple data sources to understand which products to stock to ensuring product availability and answering customer questions in-store.

Increase conversion rate

Help customers move from 'browse' to 'buy' with personalized shopping experiences that understand context to surface the perfect product, targeted marketing campaigns that maximize the power of your marketing spend, and helpful answers in the pocket of every store associate.

Reduce employee churn

Reduce time spent on shift scheduling while optimizing coverage requirements based on customer traffic, considering employee skills and availability preferences, workload distribution, and labor law requirements. Improve employee morale with improved communication and simplified schedule changes. Reduce churn during onboarding with easy access to answers in the flow of work.

Optimize marketing spend

Ensure your marketing budget is used efficiently with research, analytics, and personalization capabilities that help you reach customers wherever they are in their shopping journey. Research the optimal marketing strategy, launch precision targeted campaigns, and track campaign performance for a complete view of your marketing opportunities.

Revenue growth

Cost savings and avoidance

Improve employee experience

Copilot scenarios for Financial Services

Copilot solutions in Financial Services

Goals and challenges

The financial services industry, encompassing banking, insurance, and capital markets, is impacted by changing interest rates, inflation, regulatory policies, and the global economy. Some key challenges are quickly adapting to change, optimizing the use of rapidly evolving technological advancements, identifying competitive advantages to expand their revenue model, and adapting the way they manage their customers finances.

Demos to see how Copilot can help

Copilot assists financial services organizations with numerous tasks that impact critical areas like contact center management in banking, insurance underwriting, and portfolio management within capital markets.

- [Financial advisory support system](#)
- [Process a claim](#)
- [Issue a policy](#)
- [Centralized underwriting knowledge base](#)
- [AI-assisted broker portfolio management](#)

FSI roles

Underwriting

Portfolio Manager

Branch Manager

Customer Service

Microsoft Copilot opportunity to impact key functional KPIs

Increase client retention

Streamline operations for faster resolution of customer issues, providing tools for decision-making and strategy development. This can lead to higher customer satisfaction, increased customer lifetime value, and maximized customer investment portfolio.

Increase revenue

Differentiate customer interactions from competitors to help increase market share. Reduce the time for comprehensive portfolio evaluation with change recommendations reflecting market dynamics. Build trust and confidence among clients leading to increased number of active investors.

Improve productivity

Improve productivity by leveraging automation to quickly prioritize and accomplish daily tasks, optimize processes, and save time and effort on daily tasks.

Manage risk and compliance

Generate insights and content within the everyday flow of work, expedite investigations, and communicate more effectively to prevent and remediate compliance issues.

Revenue growth

Cost savings and avoidance

Improve employee experience
